Wi-Fi® enable your NetVanta® network with a NetVanta 150 lightweight Wireless Access Point. Providing concurrent 802.11b/g and 802.11a radio support at speeds up to 54Mbps, this business-class access point is perfect for the corporate environment needing a secure, integrated WLAN solution.

Hardware

The small form factor of the NetVanta 150 allows it to be placed in discrete locations and can be desktop or wall-mounted. In addition, the auto-sensing 10/100Base-T 802.3af compliant Ethernet port can be used to power the unit, expanding installation options by eliminating the need to be near a power outlet.

Security

The NetVanta 150 offers standard security features like shared-key authentication, MAC authentication, Static WEP (Wired Equivalent Privacy) keys and pre-shared WPA (Wi-Fi Protected Access) keys. For advanced business-class security needs, the NetVanta 150 also supports multiple SSIDs and the ability to disable SSID broadcasts, 802.1x for user-based authentication, TKIP (Temporal Key

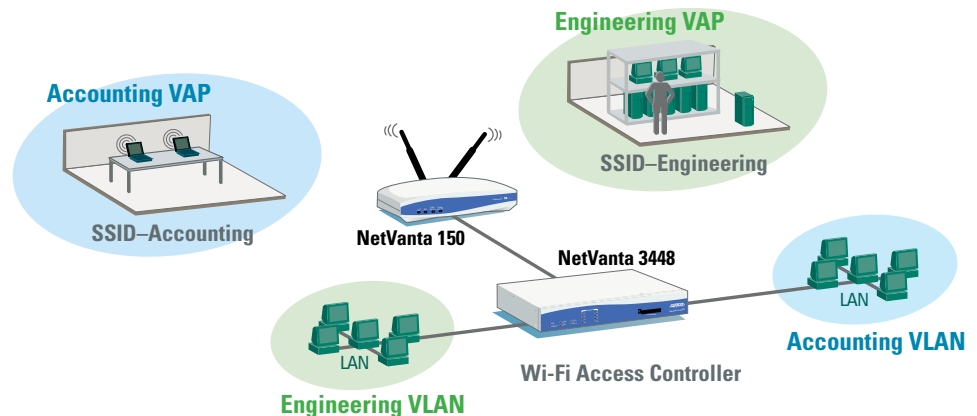

Integrity Protocol) for WPA encryption, and AES (Advanced Encryption Standard) for WPA2 encryption. Together these security standards ensure a highly protected wireless network infrastructure.

Virtual Access Points

The NetVanta 150 employs Virtual Access Points (VAPs), the equivalent of wireless Virtual LANs (VLANs). Each radio in the NetVanta 150 supports up to eight VAPs, enabling enterprise customers to securely segment their wireless network traffic.

Administration

Designed exclusively to co-exist with other NetVanta products, the NetVanta 150 is centrally managed through an ADTRAN® Wi-Fi access controller unit. No matter where the NetVanta 150 sits in the network, it can be centrally managed using the controller units Command Line Interface (CLI) or easy-to-use Web-GUI. ADTRAN Wi-Fi access controller units currently include the NetVanta 1335, NetVanta 3448, NetVanta 3430, NetVanta 3130, and NetVanta 3120. All of these Wi-Fi access controllers can manage up to eight NetVanta 150s.
