

Now you can connect with long-term reliability

Solutions you can count on

- PPC's patented compression locking mechanism creates a stable, high-force bond to the cable
- Strong mechanical attachment reduces service issues such as loose or broken connectors
- Secure mechanical attachment provides stable RF performance without degradation over time
- We've specialized on Innovation and creating the world's best connector solutions for more than 65 years
- Rated #2 by [The Wall Street Journal](#) for industry impact, and as being among the most innovative companies

The PPC Connector Difference

1-Piece Connector Design

No assembly needed or lost parts. Available for corrugated and smooth wall cable. 1/2, 7/8, 1-5/8 sizes available

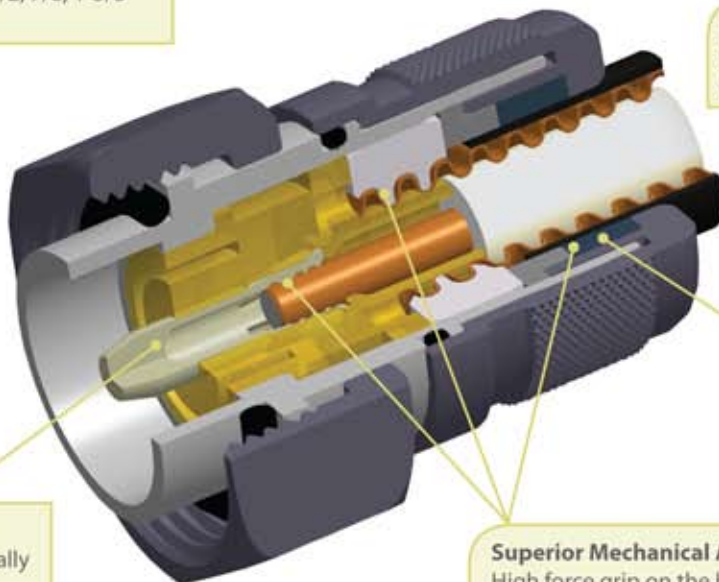

Rugged Construction

Withstands temperature extremes, vibration and tension forces

Industry's Most Secure Connector/Cable Bond

Over 5,400 lbs. of force provides consistent connector-to-cable bond

Automated Pin Depth

Pin depth set automatically yields consistent RF performance

360° Wide, Integrated Weather Seal

100% waterproof connection over multiple peaks and valleys

Superior Mechanical Attachment

High force grip on the back jacket, inner and outer conductors minimize PIM and provides solid long term RF performance

Consistent Results

No Matter Who Does the Install, or What Size Connector

It's as Easy as...

1

Prep Cable

Our all-in-one prep tool makes it easy to be certain of precision results. Drill tools available

2

Install Connector

Slide connector onto prepped cable

3

Compress

Compress with 5,400 lbs of force to clamp onto cable and create air-tight seal

Life Time Warranty

No matter what size, or cable type. PPC offers a perfect connection in 2 minutes, and **guarantees** performance for a lifetime
