

ZEN

INTELLIGENT INDOOR WIRELESS COVERAGE SYSTEM PRODUCT FACT SHEET

With the ZEN intelligent indoor wireless coverage system from Spotwave consumers can rely on cell phones, PDAs and other mobile devices to work where they're needed and used most – indoors!

- No more dropped calls
- Clear voice quality
- Faster 3G data performance
- Extends battery life
- Works with most carriers
- Coverage for up to 2500 sq ft

Wireless subscribers use cell phones, PDAs and 3G data services to be efficient and reachable any time, anywhere. But to work well, these wireless devices need reliable signal. Unfortunately, the signal is often weakest where these devices are needed and used the most – indoors.

Perfecting coverage

A strong wireless signal outside a home or office doesn't necessarily mean reliable coverage inside. And if the signal is *weak* outside, there may be *no* signal indoors. ZEN solves this problem by bringing the wireless signal indoors *and* enhancing its performance to deliver the best coverage possible.

Included with the System: Everything you need

ZEN is an elegant, simple system that includes everything required to set up and get great signal.

- Coverage Unit
- Network Access Unit
- Flexible Micro-Cable
- Mounting Hardware
- Power Supply
- Quick Set-Up Guide

Product highlights

- Out-of-box solution (easy to use and simple to install)
- Sleek design blends into any decor
- Offers clear voice quality with maximum data throughput
- Coverage up to 2500 sq ft
- Intelligent, software controlled coverage
- Automatically adjusts signal levels as needed
- Patented network-protecting technology
- Works with most wireless carriers that offer either voice or wireless data services in 1900 MHz
- Enhances signal for cell phones, PDAs, 3G enabled laptops – any device using a PCS network
- Supports CDMA, GSM, EVDO, UMTS (voice and data) in North America
- 1900 Mhz band (PCS)
