

The Official Cisco Aironet® 1200 Series In-Building Site Survey Kit

Everything You Need for a Professional Site Survey

TerraWave Solutions, in partnership with Cisco Systems, has developed the Official Cisco Aironet® 1200 In-Building Site Survey Kit. Designed to provide System Engineers with cutting edge survey capabilities, the In-Building Site Survey Kit is loaded with accessories crucial to performing professional site surveys.

Registered
Partner

TerraWave Solutions
offers five custom

versions of the Cisco In-Building Site Survey Kit. Complete kits are available in 802.11 a/b/g and 802.11 a/b/g with AirMagnet Surveyor. TerraWave also offers two Site Survey Essentials kits that offer the same products as the Totally Loaded Kits, but in fewer quantities and at a reduced price. Individually purchasing the same high-quality products contained in the kit will cost hundreds of dollars more.

**See Reverse Side for Kit
Versions and Pricing**

- One durable and transportable carrying case
